The typical big spender

44%

of revenue comes from customers aged 40 to 50 (24.7M)

50%

comes from the high income group (28M)

40%

comes from graduates (22.8M), the largest education group

31%

comes from businessmen (17.7M), ahead of white-collar at 10.3M

Men account for 31M and women 26M. TX, NY and CA are close to level at roughly 13M each.

Where the upside is

Self-employed customers spend less than their numbers suggest

They are 25.5% of accounts but 15% of revenue (8.5M). Businessmen are 18.8% of accounts and bring in 31% (17.7M).

High earners are mostly men, low earners mostly women

The high income group brings in 21M from men and 7M from women. The low income group's 10M comes almost entirely from women.

14%

of revenue is interest (8M), 6.6M of it from Blue cards

15M

each from customers with 2 or with 3 dependents, the top family sizes

29M

from married customers against 24M from singles

Three things worth a closer look

6.06%

Delinquent accounts

Government workers are highest at about 7.3% of their accounts. Businessmen are lowest at about 5.3%.

42.5%

Not active in 30 days

Only 57.5% of cards get used in the first month, so onboarding has room to improve.

+3.6%

Revenue, Q1 to Q4

Transactions grew about 6%, so revenue per transaction slipped from roughly $86 to $84.

Week 53 jumped 28.8% to 1.20M after a 12.8% dip the week before, so it is worth checking whether that is a real trend or a year-end bump.
